

In Situ Data in the Interplay of Remote Sensing II

Guest Editors:

Prof. Dr. Peter Dietrich

Prof. Dr. Erik Borg

**Dr. Mona Ahmad Mahmoud
Morsy**

**Dr. Mahmud Haghshenas
Haghighi**

Deadline for manuscript
submissions:
closed (29 February 2024)

Message from the Guest Editors

The previous Special Issue 'In Situ Data in the Interplay of Remote Sensing' was a great success. For this second volume, we welcome the submission of manuscripts that deal with all aspects of the provision of in situ data for the interpretation and evaluation of remote sensing data. The focus of this Special Issue is on the efficiency and operability of in situ data provision, as well as on the reliability, accuracy, objectivity or accessibility, timeliness, completeness, appropriate scope, and relevance of in situ data. In addition, of interest are measurement methods and measurement strategies, test sites, and national and international networks dedicated to data provision, data combinations, and the creation of historical time series that are useful for calibrating, validating and verifying remote sensing sensors, missions, processors, data, and value-added information products. Therefore, this call is also open for all related topics concerning Cal/Val activities.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
