Ultimo, NSW 2007, Australia

Deadline for manuscript
submissions:

closed (26 May 2024)

Message from the Guest Editor

Dear Colleagues,

The main goal of the Editorial Board Members' Collection Series is to showcase articles that emphasize the advanced integration of ground-based measurements covering vegetation, soil, climate, evapotranspiration (ET), carbon dioxide (CO₂) fluxes, and additional greenhouse gas (GHG) fluxes with remote sensing data, analysis methods, and modeling. Relevant papers dealing with the link between CO₂ fluxes and ET, as well as water-use efficiency, will also be considered.

Prof. Dr. Alfredo Huete

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
