19, 1090 Vienna, Austria

Deadline for manuscript  
submissions:

**closed (15 December 2021)**

### Message from the Guest Editors

Dear Colleagues,

The current UN report on Biodiversity and Ecosystem Services depicts an alarming and shocking picture of the Earth. With accelerating rates of species extinction, our environment is declining globally at unprecedented rates.

This Special Issue will include studies focused on the remote observation of spatial patterns and temporal changes in the biodiversity of forests, at local to global scales. We invite authors to submit recent research that specifically addresses the detection or monitoring of

- biodiversity of forests in the context of classical species diversity;
- the mapping of changes in diversity;
- the floristic composition of forests;
- invasive species; and
- the functional diversity of forests.

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
