

## Advanced Modelling in Water Resources Using GIS and Remote Sensing Techniques

Guest Editors:

**Dr. Richarde Marques Da Silva**

Department of Geosciences,  
Federal University of  
Paraíba/CCEN, João Pessoa  
58051-900, PB, Brazil

**Prof. Dr. Celso Augusto  
Guimarães Santos**

Department of Civil and  
Environmental Engineering,  
Federal University of Paraíba,  
João Pessoa 58051-900, Brazil

**Dr. Victor Hugo Coelho Rabelo**

Department of Civil and  
Environmental Engineering,  
Federal University of Paraíba,  
Center for Technology, João  
Pessoa, Paraíba State 58051-900,  
Brazil

Deadline for manuscript  
submissions:  
**closed (31 December 2021)**

### Message from the Guest Editors

Remote sensing data play an important role in the hydrological scientific community, mainly for overcoming and compensating for the limitations of observed data at regional and global scales. Currently, remotely-sensed data are being used in many applications related to water resources, such as rainfall, soil moisture, evapotranspiration, drought risk, water runoff-erosion modelling, groundwater, landslide, surface water inventory, and snowmelt runoff forecasts.

Papers showing novel and/or relevant techniques to study water resources management or some interesting applications in all subfields of the hydrological sciences will be considered. Well-prepared review papers are also welcomed.

Topics of interest may include, but are not limited to:

- Droughts and Water availability
- Evapotranspiration estimation and Hydrologic modeling
- Land use predicting
- Snow cover and glacial lands
- Water resources management
- Groundwater mapping
- 3D mapping, Drone and high resolution images
- Classifications and applications using Drone images

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
