

Remote Sensing in 2021

Guest Editors:

Dr. Prasad S. Thenkabail

Prof. Dr. Clement Atzberger

Prof. Dr. Lefei Zhang

Dr. Richard Gloaguen

Dr. Jorge Vazquez

Deadline for manuscript
submissions:
closed (31 October 2022)

Message from the Guest Editors

The past year has seen significant developments in photogrammetry and remote sensing. While it is impressive that remote sensing has enjoyed such immense success, with over 12,000 papers published in the field in 2021 alone, the sheer volume of publications means it is often difficult or simply too time-consuming for researchers to review progress and keep abreast of developments. Young researchers are particularly prone to feeling swamped and confused.

This is why *Remote Sensing* is organizing this New Year Special Issue, which will highlight the latest advancements in the past year and prospective future development in remote sensing research with the goal to provide a thorough overview of the field. The Special Issue will provide direction and guidance and serve as a point of reference for scholars to begin their research in 2022.

The Special Issue solicits:

- Editorials from EiCs highlighting journal achievements;
- Reviews from members of our Editorial Board about their expertise;
- Reviews from Guest Editors about SI topics;
- Reviews from scholars in the field.

an Open Access Journal by MDPI

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S.
Geological Survey (USGS), USGS
Western Geographic Science
Center (WGSC), 2255, N. Gemini
Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and
Geographic Information Systems,
Peking University, Beijing, China

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
