Deadline for manuscript
submissions:

closed (28 February 2019)

Message from the Guest Editors

Dear Colleagues,

This Special Issue attempts to capture, consolidate, and promote some of the very latest creative thinking around satellite data product development, algorithm design, big data image processing and applications that is being undertaken within Europe and in European Institutions. With the successful launch of many of the Sentinel missions by the European Space Agency, alongside services and consistent product development being undertaken through the Copernicus Programme, this Special Issue is incredibly timely to make sense of some of the best Earth Observation and remote sensing research. The Editors welcome papers from a wide variety of topics. To not restrict high quality papers from teams working internationally, we ask that one of the paper authors be working at a European Institute at the time of submission.

Prof. Dr. Kevin Tansey

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
