Remote Sensing of Vegetation Phenology

Guest Editors:

Message from the Guest Editors

Dr. Fabienne Maignan

Dear Colleagues,

Dr. Natasha MacBean

Dear Colleagues

Dr. Koen Hufkens

We are delighted to announce this Special Issue on the

Dr. Soudani Kamel

phenology of terrestrial vegetation. Phenology is the variation of recurrent key stages in the plant life cycle, linked to environmental changes. By extension, it also includes the mean seasonal cycle of relevant biophysical and biochemical quantities and their temporal and spatial changes. Remote sensing is a major player in this science, and we welcome all contributions related.

Deadline for manuscript submissions:

Dr. Fabienne Maignan
Dr. Natasha MacBean

closed (30 April 2020)

Dr. Koen Hufkens
Prof Kamel Soudani

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend Remote Sensing for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
