Deadline for manuscript submissions:

**closed (31 December 2021)**

### Message from the Guest Editors

Dear Colleagues,

Our world inevitably faces various public crises, including severe events in public security, public health, mass transportation, or other public service. Remote sensing is effective in sensing environmental changes, but it falls short in observing human dynamics, which is a critical factor in supporting effective decision-making in governance and public management. Fortunately, geospatial information technologies provide a generalized human observation network, which could support the sensing and observation of human activities and their dynamics.

This Special Issue aims to explore new solutions in Human-oriented observation and smart decision-making for friendly governance and public management. Submitted papers should present novel contributions and innovative applications. Relevant topical reviews are also welcome. More details can be read on the website.

Prof. Dr. Zhixiang Fang

Dr. Ling Yin

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
