Institute of Methodologies for  
Environmental Analysis, National  
Research Council (IMAA/CNR),  
85050 Tito Scalo, Potenza, Italy

**Dr. Elisabetta Ricciardelli**

Institute of Methodologies for  
Environmental Analysis, National  
Research Council (IMAA/CNR),  
85100 Tito Scalo, PZ, Italy

Deadline for manuscript  
submissions:

**closed (30 June 2022)**

### Message from the Guest Editors

In the last half-century, observing system improvements have been driven by the increasing demands for higher-resolution data for numerical models and the need for long-term measurements and global coverage. This has resulted in a growing demand for data access and the integration of data from an increasingly wide variety of observing system types and networks, as well as for atmospheric observations from satellite platforms. With the increase in observations, there was an improvement in the quantification of climatic variables (greenhouse gases, clouds, and aerosols), weather variables (water vapor, temperature, wind, and cloud cover), and in monitoring air quality (particulate and gaseous pollution) or atmospheric chemistry (trace gases).

The Special Issue will present recent results in Advanced Infrared Observation of Earth's Atmosphere, including innovative applications for meteorology, climatology and atmospheric physics, and validation of retrievals based on independent measurements.

## Editor-in-Chief

### Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S.  
Geological Survey (USGS), USGS  
Western Geographic Science  
Center (WGSC), 2255, N. Gemini  
Dr., Flagstaff, AZ 86001, USA

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
