## In Situ Data in the Interplay of Remote Sensing

Guest Editors:

**Prof. Dr. Peter Dietrich**

Department Monitoring and  
Exploration Technologies,  
Helmholtz Centre for  
Environmental Research GmbH -  
UFZ, 04318 Leipzig, Germany

**Prof. Dr. Erik Borg**

German Aerospace Center (DLR),  
German Remote Sensing Data  
Center (DFD), National Ground  
Segment, 17235 Neustrelitz,  
Germany

**Dr. Mona Ahmad Mahmoud  
Morsy**

Geology Department, Faculty of  
Science, Suez Canal University,  
Ismailia 41522, Egypt

### Message from the Guest Editors

For this Special Issue, we welcome the submission of manuscripts dealing with all aspects of the provision of in-situ data for the interpretation and evaluation of remote sensing data. The focus of interest is on the efficiency and operability of in-situ data provision, as well as on the reliability, accuracy, objectivity or accessibility, timeliness, completeness, appropriate scope, and relevance of in-situ data. In addition, of interest are measurement methods and measurement strategies, test sites, and national and international networks dedicated to data provision, data combinations, and the creation of historical time series useful for calibrating, validating, verifying remote sensing sensors, missions, processors, data, and value-added information products. Therefore, this call is also open for all related topics concerning Cal/Val activities.

Deadline for manuscript  
submissions:

**closed (31 October 2022)**

## Editor-in-Chief

### Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S.  
Geological Survey (USGS), USGS  
Western Geographic Science  
Center (WGSC), 2255, N. Gemini  
Dr., Flagstaff, AZ 86001, USA

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
