submissions:

closed (30 April 2018)

Message from the Guest Editor

Dear Colleagues,

Concepts for simultaneous measurements of winds and currents using small modifications to available technology have been put forward in China, Europe, and the United States. The feasibility of measuring surface currents from satellite has been demonstrated through these efforts. Papers that address the technology development towards satellite measurements of ocean surface currents are strongly encouraged, as are results for satellite and airborne campaigns. Also encouraged are papers on HF Radar measurements of currents, and papers on the validation of either type of current measurement.

Prof. Mark Bourassa

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
