

Advances in Remote Sensing of Snow Cover

Guest Editors:

Prof. Dr. Lahoucine Hanich

Faculty of Sciences and
Techniques, Cadi Ayyad
University, Abdelkrim Khattabi
Avenue, Marrakesh 40000,
Morocco

Prof. Dr. Abdelghani Boudhar

Faculty of Sciences and
Techniques, Sultan Moulay
Slimane University, Av Med V, BP
591, Beni-Mellal 23000, Morocco

Deadline for manuscript
submissions:

closed (15 May 2023)

Message from the Guest Editors

Seasonal snow provides water to approximately two billion people around the world. In mountainous areas, snow cover is a key component of the hydrological cycle because it governs how much and when water will be available downstream.

This Special Issue aims to discuss the latest advancements in remote sensing to monitor snow cover dynamics and to therefore evaluate the snow water equivalent. Submissions of original and innovative research, especially in mountainous areas using different remote sensing techniques and ground observations that includes new approaches and algorithms are encouraged. Papers may cover but are not restricted to the following themes:

- Snow cover fraction assessment from image processing and AI algorithms
- Long-term snow cover mapping and spatiotemporal change
- Fusion techniques for snow cover mapping
- Snow water equivalent and modelling at the local and basin scales
- Deep learning and machine learning for snow parameter retrieval
- Remotely sensed snow data and their applications
- Operational use of snow cover on water management
- Experimental observatory and systems for snow monitoring

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S.

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
