submissions:  
**closed (10 August 2023)**

### Message from the Guest Editors

Dear colleagues,

Urbanization has become a widespread issue across the globe, with over half of the human population living in cities. A rising population and migration have led to a rapid growth of mega-cities. In recent decades, public attention has been focused on the sustainability and resilience of cities and communities, which have been reenergized by the United Nations' initiative for Sustainable Development Goals (SDGs) commencing in 2015. Geospatial technologies have been widely used in assessing natural resources and environmental conditions, evaluating urbanization and associated impacts and analysis and modeling of sustainability of cities and communities.

This Special Issue invites manuscripts that demonstrate state-of-the-art geospatial technologies, in particular, global urban observation methods and techniques, in addressing issues related to sustainable cities and communities. Potential topics are showing on the website.

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
