Minerals and Land-Use Planning: Sustainable Narratives and Practices

Guest Editors:

Dr. Katharina Gugerell

Department of Landscape,
Spatial- and Infrastructure
Sciences, Institute of Landscape
Planning, University of Natural
Resources and Life Sciences,
Vienna, Austria

Dr. Gregory Poelzer

Department of Social Sciences,
Technology and Arts, Political
Science, Luleå University of
Technology, 971 87 Luleå,
Sweden

Dr. Andreas Endl

Department of Socioeconomics,
Institute for Managing
Sustainability, Vienna University
of Economics and Business,
Welthandelsplatz 1, Building D1,
A-1020 Vienna, Austria

Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editors

Dear Colleagues,

We invite scholars interested in the outlined scope to submit original research articles that engage in-depth with the interdisciplinary driven nature of this topic. This issue aims to attract contributions that (i) debate an integrated perspective on land use by balancing the environmental, social and economic dimensions; (ii) investigate participatory and deliberative approaches to land-use planning dealing with mineral extraction or industrial development related to mineral development/energy transition, (iii) discuss the role of safeguarding mineral resources compared to other land-use options; (iv) examine post-mining land-use in its broader socio-spatial context; (v) debate dimensions of efficient land-use and its environmental, social and economic impacts, (vi) critically land-use conflicts related to mineral development or post-mining, (vii) investigate attitudes towards land-use and the public or societal acceptance about certain practices related to mineral land-uses. We welcome contributions from early career researchers and young scholars as well as critical discussions of the matter from a sustainability sciences perspective.

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Sciences*) / CiteScore - Q1 (Nature and Landscape Conservation)
