Message from the Guest Editor

Dear Colleagues,

The purpose of this Special Issue, which is associated with a seminar of the same title promoted by the University of Aveiro, is to understand if and how WCE is considered in the actual spatial planning and water resources legal framework, as well as which barriers and drivers to its implementation are being addressed. Ultimately it aims to promote a debate within the scientific community on how we should plan for a water circular economy, in particular, using River Basin Management Plans and Spatial Plans.

This Special Issue invites academics and practitioners to present and discuss case studies of territories, cities, and projects that have addressed the challenge of integrating WCE into their instruments of water resources planning and spatial planning, institutional, and design practices. It suggests four major topics, namely: a) water resources planning for water circular economy; b) spatial planning for water circular economy; c) water circular economy and integrated water resources management; d) indicators in planning for water circular economy.

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Sciences*) / CiteScore - Q1 (Nature and Landscape Conservation)
