Message from the Guest Editors

Dear Colleagues,

In this Special Issue, we invite articles devoted to forecasting the short-, medium-, and long-term consequences of global shocks, building new business models, as well as resource provision of processes that contribute to the return of the world economy to the trajectory of sustainable development. We also welcome regional studies devoted to the search for new growth points, as well as industry topics related to the extraction, transportation, and processing of natural resources. The low-carbon agenda, climate and "green" projects along with best available techniques will be also in the focus of our discussion for providing sustainable future.

Deadline for manuscript
submissions:

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Sciences*) / CiteScore - Q1 (Nature and Landscape Conservation)
