

## Special Issue

# Geodiversity Assessment: What, Why and How?

### Message from the Guest Editor

The term “geodiversity” emerged 30 years ago to define the range of geological (rocks, minerals, fossils, landforms, physical processes, soil, and hydrological) features, including their assemblages, structures, systems, and contributions to landscapes. Traditionally associated with the theme of geoconservation, it has increasingly come to be perceived as a much broader topic, with influence on approaches that cover all domains of the geosciences. Manuscript submissions focusing on geodiversity assessment are welcome and encouraged. The topics of interest include but are not limited to: Methods to assess geodiversity; GIS and mapping of geodiversity; Assessment of ecosystem services from geodiversity; Relations between geodiversity and biodiversity; Relations between geodiversity and geoheritage; Relations between geodiversity and land-use; Geodiversity data for land-use planning; Geodiversity data for nature conservation.

## About the Journal

### Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1  
(Nature and Landscape Conservation)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 33.4 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2024).
