submissions:

closed (30 June 2017)

Message from the Guest Editor

Dear Colleagues,

On June 23, 2016, the United Kingdom voted to separate from the EU. In the hours after the announcement, we could observe a huge reaction in the financial markets, e.g., the British pound fell below 1.30 against the US dollar—the lowest level since 1985. In this Special Issue, we seek contributions on two main research questions: First, the estimation of the probability of a Brexit with data available before June 23. Among others, interesting research questions are whether financial markets anticipated this decision, and whether there was a difference between spot and derivative markets in processing the relevant information. Second, forecasting the mid- and long-term economic and financial consequences of such a decision.

Submissions on any of these interesting developments would be welcome.

Alex Weissensteiner

Message from the Editor-in-Chief

Risks is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High visibility: indexed within **Scopus**, **ESCI (Web of Science)**, **EconLit**, **EconBiz**, **RePEc**, and **other databases**.

Journal Rank: CiteScore - Q1 (Economics, Econometrics and Finance (miscellaneous))
