Deadline for manuscript  
submissions:

**closed (31 December 2024)**

### Message from the Guest Editor

Dear Colleagues,

DeFi has evolved from a largely insular system solely for agents that want to be exposed to crypto risk returns to a system that is now looking at the financing of real assets. However, given the recent spectacular failure of FTX and the prosecution of Binance, corporate entities are reticent to use DeFi. Corporates are aware of the potential benefits but are nervous about the risks and the fact that established risk management models do not exist. The objective of this Special Issue would be to identify the best practice in DeFi risk management, both applied and theoretical. A range of authors covering this area have been identified. I suggest that it would be of interest to readers of the journal as it comes under the heading of risk management with digital assets.

## Message from the Editor-in-Chief

*Risks* is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High visibility:** indexed within **Scopus**, **ESCI (Web of Science)**, **EconLit**, **EconBiz**, **RePEc**, and **other databases**.

**Journal Rank:** CiteScore - Q1 (Economics, Econometrics and Finance (miscellaneous))
