Message from the Guest Editors

Dear Colleagues,

In its production processes, agriculture faces the most risks compared to other sectors of the economy. The management of these risks is becoming increasingly more efficient due to the proliferation of advanced information and forecasting systems and precision agricultural technologies; however, production processes continue to be exposed to increasingly extreme environmental impacts.

This Special Issue collects papers that address the risks along agricultural value chains and any of their aspects.

Message from the Editor-in-Chief

Risks is published in an open access format; research articles, reviews, and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes submissions that (a) contribute with insight, outlook, understanding, and overview; (b) show creativity in terms of pedagogical methods and techniques; (c) help the transfer of theoretical and applied research into applications in the public and private domains; and (d) show responsibility for the impact on society. The scientific and the general public have unlimited free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High visibility: indexed within **Scopus**, **ESCI (Web of Science)**, **EconLit**, **EconBiz**, **RePEc**, and **other databases**.

Journal Rank: CiteScore - Q1 (Economics, Econometrics and Finance (miscellaneous))
