Deadline for manuscript
submissions:

closed (30 November 2020)

Message from the Guest Editors

Dear Colleagues,

Robotics is the intersection of science, engineering, and technology that produces machines, called robots, that substitute or replicate human actions. The robotics industry is still relatively young, but has already made amazing strides. From the deepest depths of our oceans to the highest heights of outer space, robots can be found performing tasks that humans could not dream of achieving.

This Special Issue aims at disseminating the latest research achievements, findings, and ideas in the robotics field, with particular attention to the latest European activities in robotics. This Issue will include revised and substantially extended versions of selected papers that were presented at the 29th International Conference on Robotics in Alpe-Adria-Danube Region (RAAD2020) sponsored by IFToMM. However, we are also strongly encouraging the submission of additional contributions from researchers working in this field who did not participate to the RAAD2020 Conference, in order to further enlarge the field coverage.

Message from the Editor-in-Chief

It is my great pleasure to welcome you to our open access journal, *Robotics*, which is dedicated to both the foundations of artificial intelligence, bio-mechanics and mechatronics, and the real-world applications of robotic perception, cognition and actions. The 21st century is the robotics century and intelligent robots will change our lifestyle forever. Let us work together toward the realization of intelligent robots step by step.

It is great fun to create intelligent robots and imagine their practical applications. *Robotics* is now ready to serve you in the long journey towards such a goal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Robotics*) / CiteScore - Q1 (Mechanical Engineering)
