Message from the Guest Editors

Dear Colleagues,

The Guest Editor is inviting submissions to a Special Issue of *Safety* on the subject area of “Industrial Safety”. Qualitative (QRA, HAZAN, etc.) and quantitative (HAZOP, HAZID, WHAT IF, MEC, FMEA, BOW-TIE, etc.) risk assessment models and methods for hazard reduction are under the close attention of industrial safety engineers. Articles addressed to Sustainable Development Goal (SDG) targets related to achieving industrial safety and security can also be considered.

The organization of occupation and industrial safety management system on enterprises, and health administration problems, might be suitable themes for the Special Issue.

Articles dealing with the technologies emerging from the new industrial revolution (Industry 4.0), and its connection with Industrial Safety, are welcomed. The use of advanced digital tools for collecting, storing and processing information (sensors, drones, intelligent cameras, etc.), assisting in accidents prevention to ensure high level of industrial safety, are also interesting topics for this Special Issue. Cybersecurity issues are also of interest.
