

## Special Issue

# Ergonomics and Sustainability

### Message from the Guest Editor

This Special Issue reflects the relationship between ergonomics and human factors and sustainability. Research indicates the meaning of the term “sustainability” has changed and evolved over time. Starting from the protection of the environment, this concept has undergone different evolutions, involving consumption and production, efficient use of resources, transportation, production and supply of energy, waste and recycling, and the development of competitive services. Human characteristics, behavior and performance, and human interactions with technology are vital elements of these. There is a natural synergy between sustainability and ergonomics, in order to understand and optimize the results of human–machine–environment interactions. The benefits of health and safety at work are found in corporate social responsibility, part of the sustainable development component. The ergonomics of workplaces and health of employees contribute to the sustainable development of organizations. Thus, ergonomics and sustainability are intertwined, leading to a bidirectional relationship.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Raphael Grzebieta

Transport and Road Safety (TARS), University of New South Wales, Old  
Main Building (K15), Sydney, NSW 2052, Australia

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), SafetyLit,  
and other databases.

##### Journal Rank:

CiteScore - Q2 (Safety Research)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 34 days after  
submission; acceptance to publication is undertaken in 5.6  
days (median values for papers published in this journal in  
the second half of 2025).
