Deadline for manuscript submissions:
closed (30 September 2024)

Message from the Guest Editors

Dear Colleagues,

The most vulnerable elements influencing both human life and the environment are disasters. Smart cities are mainly affected by disasters. This demonstrates the need for effective disaster management systems in urban areas.

Smart city alert systems integrate cutting-edge technologies to track a variety of variables, including weather conditions, environmental factors, and the condition of the infrastructure, in order to forecast and avoid possible disasters.

With the ability to process vast amounts of data collected from sensors, satellites, and other sources, machine learning algorithms are increasingly becoming a powerful tool for smart city alert systems to identify potential vulnerabilities and predict failures in real time.

For this Special Issue, we aim to present a collection of review and original research articles related to the latest technologies on the most recent developments in disaster detection and prevention systems, such as smart sensors, artificial intelligence-based damage identification, infrastructure disaster prediction, and early warnings for infrastructure safety.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.
Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
