## Prospects and Applications of Piezoelectric Sensors and Energy Harvesting

Guest Editors:

**Dr. Vincenzo Mariano  
Mastronardi**

Department of Innovation  
Engineering, Italian Institute of  
Technology (IIT), University of  
Salento, 73100 Lecce, Italy

**Dr. Iman Mehdipour**

Center for Biomolecular  
Nanotechnologies, Istituto  
Italiano di Tecnologia, 73010  
Aranzano, LE, Italy

Deadline for manuscript  
submissions:

**closed (30 April 2024)**

### Message from the Guest Editors

Piezoelectric micro- and nanogenerators (PENG) and self-powered sensors are increasingly attracting the attention of researchers from across the world. One reason for the rising interest is their broad application prospects in areas that include energy harvesting as a promising solution to significantly improve the energy efficiency of the applications. Moreover, they enable self-powered sensing to eliminate the use of batteries in some applications as medical devices, healthcare, digital security, big data, and the internet of things (IoT). Another reason is the multidisciplinary nature of the research studies, which involve materials physics and chemistry, electronics, computer science, medical devices, etc. The target of this special issue is to investigate the recent trends of energy scavenging and sensing enabled by piezoelectric technologies to present the latest research, with particular focus on prospects and applications. Original papers and focused reviews are encouraged for this Special Issue's submissions

## Editor-in-Chief

### Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
