Message from the Guest Editors

We are pleased to announce the Special Issue of *Sensors* entitled "2D/3D Printed Sensors and Electronics". In this Special Issue, we want to collect a number of contributions to explore novel materials, techniques, and applications related to 2D/3D printed electronics. A non-comprehensive list of possible topics includes synthesis and characterization of 0D to 3D printable materials for sensing and actuating applications, fabrication technologies for printed sensors and electronic devices, and innovative applications of 2D/3D printed electronics.

We invite authors to submit original communications, articles, and reviews on sensing devices and systems where 2D/3D printing techniques are involved. We are looking forward to your contributions and fruitful discussions.
