Recent Advances in Intelligent Optical Coherence Tomography (OCT) Device, Techniques and Sensors

Guest Editors:

Prof. Dr. Zhihua Ding

College of Optical Science and Engineering, Zhejiang University, Hangzhou 310027, China

Dr. Tianyu Zhang

College of Instrumentation & Electrical Engineering, Key Laboratory of Geophysical Exploration Equipment, Ministry of Education of China, Jilin University, Changchun 130026, China

Deadline for manuscript submissions:

closed (19 January 2024)

Message from the Guest Editors

Dear Colleagues,

Optical coherence tomography (OCT) technology is rooted in the principle of weak coherent light interference, enabling innovative acquisition of images of sample planes or volumetric structures. OCT's applications range from biomedicine to the manufacturing, agriculture, and food sectors.

With the rapid development of artificial intelligence (AI) technology, intelligent devices are being empowered by AI to achieve information perception, logical reasoning, and decision making. In recent years, researchers have actively explored the intelligence of OCT devices, resulting in numerous application branches. Intelligent OCT devices are rapidly evolving towards precision, miniaturization, speed, and multi-modal integration.

This Special Issue focuses on research into the intelligence of OCT equipment, encompassing software, hardware, intelligent algorithms, and the application of intelligent OCT in fields such as medicine, industry, and art.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
