Sensors Applications on Emotion Recognition

Guest Editors:

Prof. Dr. Jason C. Hung

Department of Computer Science and Information Engineering, National Taichung University of Science and Technology, Taichung City 404348, Taiwan

Dr. Neil Yuwen Yen

School of Computer Science and Engineering, The University of Aizu, Aizu-Wakamatsu 965-8580, Japan

Dr. Hao-Shang Ma

Department of Computer Science and Information Engineering, National Taichung University of Science and Technology, Taichung City 404348, Taiwan

Deadline for manuscript submissions:

closed (10 June 2024)

Message from the Guest Editors

Dear Colleagues,

Emotion recognition is an ad hoc research subject in various fields that apply human emotional reactions as a signal for marketing, automation, entertainment, technical equipment, and human–robot interaction. Sensors are used to detect human emotions and are associated with many developments.

This Special Issue aims to bring together researchers and practitioners working on the design, development, and evaluation of sensor-based emotion recognition systems. The objective of this Special Issue is to provide a comprehensive view of the latest research and advancements in the field of sensors applications on emotion recognition. This Special Issue provides a framework to discuss and study sensor applications from the perspective of emotion recognition. We invite researchers to contribute to this Special Issue by submitting comprehensive reviews, case studies, and research articles in the field of theoretical and methodological interdisciplinary sensors applications on emotion recognition. In particular, sensor application technologies specifically devised, adapted, or tailored to address problems in emotion recognition are welcome.

Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
