## Green Sensors Networking 2023

Guest Editors:

**Dr. Miguel Rodríguez Pérez**

Department of Telematics  
Engineering, University of Vigo,  
36310 Vigo, Spain

**Dr. Sergio Herrería Alonso**

atlanTTic Research Center for  
Telecommunications  
Technologies, Universidade de  
Vigo, 36310 Vigo, Spain

**Prof. Dr. José Carlos López  
Ardao**

atlanTTic Research Center for  
Telecommunication  
Technologies, University of Vigo,  
36310 Vigo, Spain

Deadline for manuscript  
submissions:

**closed (20 July 2023)**

### Message from the Guest Editors

The purpose of this Special Issue is to present the most recent advances, or comprehensive reviews, relating to green wireless sensor networks. Sensor nodes are commonly hardware-constrained devices that must work under severe resource restrictions.

The key for reducing energy consumption in WSNs is the wise utilization of network resources, including power, spectrum, time, and spatial resources. For example, in these networks involving a large number of distributed devices, cooperative power control techniques based on convex optimization, deep-learning methods or game theory permit governing transmission power efficiently. Furthermore, energy-harvesting technology is frequently used to provide a virtually uninterrupted power supply to the sensor nodes although, due to the intermittent and variable nature of ambient energy sources, accurate prediction schemes of future energy availability may be required to avoid energy shortages.

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Department of Electrical and  
Information Engineering,  
Politecnico di Bari, Via Orabona  
4, 70126 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
