Message from the Guest Editors

With the rollout of 5G happening around the world, 6G and its capabilities are slowly moving from being an idea to being a potential reality. 6G and its key drivers—that is, connectivity for all things, time-sensitive applications, and high-fidelity holographic society—are promising to revolutionise communication networks and be used in applications that are dependent on wireless and ultra-massive machine-type communication.

With this in mind, 6G is envisaged to enable the implementation of various sensor-based applications and technologies in numerous societal/industrial sectors, including healthcare, energy management, the automotive industry, agriculture, the Industrial Internet of Things (IIoT), and the Internet of Everything (IoE). Accordingly, this Special Issue invites innovative contributions on the development, testing, and realisation of 6G-enabled applications across all societal domains. Papers address all fields of 6G and 5G beyond are welcome.

Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
