Message from the Guest Editors

Dear Colleagues,

In recent years, space robots have developed rapidly, which play a particularly important role in unmanned and manned space science exploration activities to achieve space automation and intelligent control. International space station in-cabin robots, space robotic arms and other orbital robots have been widely practical applications. Many universities and research institutions have a lot of research in space robots including target grasping and removal, on-orbit service maintenance, space on-orbit assembly and scientific exploration, etc.

This Special Issue aims to publish studies covering the applications and technology of space robots. Topics may cover the results of past missions, the design of future missions or the technology related to space robots development.

4, 70126 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
