

## Challenges in Human-Robot Interactions for Social Robotics

Guest Editors:

**Dr. João Silva Sequeira**

**Dr. Álvaro Castro Gonzalez**

**Dr. Fernando Alonso Martín**

**Dr. José Carlos Castillo**

Deadline for manuscript  
submissions:

**30 October 2024**

### Message from the Guest Editors

This Special Issue focuses on human–robot interactions in social robotics. Nowadays, interactions with computational devices are ubiquitous in daily life, and the lessons acquired have helped design our interactions with robots. We must improve the effectiveness of the interactions between humans and robots to learn about humans in their social environment. Moreover, existing technologies in social robotics affect how humans interact with these robots. Novel technologies and applications endow robots and humans with new ways to interact that will potentially improve human–robot interactions.

Robots complying with social norms, the challenges in developing interfaces to interact with social robots, the dynamics of human perception, novel interaction capabilities, sustainability, closing the technological gap between humans and robots, the design of the robots considering their purpose within the interaction, and the future of social robots are just a few examples of themes this Special Issue aims to cover.

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
