Wearable Sensors for Behavioral and Physiological Monitoring

Guest Editors:

Prof. Dr. Joan Condell

School of Computing,
Engineering and Intelligent
Systems, Ulster University,
Londonderry BT48 7JL, UK

Prof. Dr. Gerard Leavey

Director, The Bamford Centre,
Ulster University, Coleraine, BT52
1SA, UK

Deadline for manuscript
submissions:

31 January 2025

Message from the Guest Editors

Wearable technologies offer a promising opportunity to empower individuals to not only manage their own health but to explore trends and actively engage with primary health services. Wearable technologies have significant market penetration. Despite their low penetration compared to mobile phones, wearable devices have much lower attrition compared to mobile apps for health, thus maximising their potential impact.

There is growing pressure, post-COVID-19, on various health services globally; waiting lists continue to rise and demand for primary and secondary care services continues to increase. While innovative technologies have the potential to elevate some of this burden and empower individuals at home, the true cost of such technologies must be explored. Where such pressure exists both on individuals and the global health system at large, we must focus on sustainable health; wearables offer an ideal platform, empowering individuals and connecting care in the home to the primary care setting.

Potential topics include but are not limited to:

- wearables
- sustainable health
- remote monitoring
- wearable sustainability

Special Issue

sensors

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
