Deadline for manuscript  
submissions:

**closed (5 October 2023)**

### Message from the Guest Editors

Dear Colleagues,

There is an increasing need for direct analysis, sensing, detection, and interpretation of the results at the (crime) scene or location of interest. Well-known examples include the investigation of fingermarks, body fluid analysis, blood stain pattern analysis, and DNA analysis. Further, the dating of evidence such as blood and bruises and the determination of the course of events with, for instance, spectroscopic techniques is important. The use of microfluidics and miniaturization in combination with analytical detection methods (e.g., IR, MS, GC, and hyphenated techniques) is expected to be possible soon. These kinds of physical, photonic, chemical, and bio(chemical) analysis, sensing, and detection principles are not only suitable for forensic crime scene analysis, but also for other investigations at scenes/locations of interest.

Dr. Brigitte Bruijns

Dr. Roald M. Tiggelaar

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
