AI-Enabled Low Power Implantable and Wearable Medical Devices

Guest Editors:

Dr. Arfan Ghani

Department of Computer Science and Engineering, School of Engineering, American University of Ras al Khaimah, Ras al Khaimah P.O. Box 10021, United Arab Emirates

Dr. Chan Hwang See

School of Computing, Engineering and the Built Environment, Edinburgh Napier University, Edinburgh EH10 5DT, UK

Dr. Thomas Dowrick

Dept of Med Phys & Biomedical Engineering, University College London, London, UK

Deadline for manuscript submissions:

closed (20 April 2022)

Message from the Guest Editors

This Special Issue seeks submissions detailing cutting edge research from academia, industry, and practitioners with an emphasis on original, novel, innovative, and impact-oriented research providing insights into “AI-Enabled Low-Power Implantable and Wearable Medical Devices”. This Special Issue seeks all types of manuscripts, including reviews, research articles, and communications). An area of particular interest to this Special Issue is research that considers intelligent machine learning-based front-end sensing that could be embedded into low-power implantable and wearable medical devices as well as AI-enabled medical devices that will promote user autonomy and independent living.

To summarise, this Special Issue aims to bring together innovative developments and synergies in the below-mentioned topics but are not limited to the following:

- Embedded machine learning in wearable/implantable devices;
- Flexible electronic wearable devices;
- Textile sensors;
- Low-power electronic solutions for signals acquisition and processing from wearable sensors;
- Conductive/e-textiles for body area sensing;

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
