## Affective and Immersive Human Computer Interaction via Effective Sensor and Sensing (AI-HCIs) II

Guest Editors:

**Prof. Dr. Jinchang Ren**

National Subsea Centre & School of Computing, Robert Gordon University, Aberdeen, UK

**Dr. Pourya Shamsolmoali**

School of Communication and Electrical Engineering, East China Normal University, Shanghai, China

**Dr. Maher Assaad**

Department of Electrical and Computer Engineering, Ajman University, Ajman, United Arab Emirates

Deadline for manuscript submissions:

**closed (30 June 2023)**

### Message from the Guest Editors

Human–computer interaction (HCI) is crucial for user-friendly interactions between human users and computer systems. HCI is not only requested to provide effective input/output; it is also expected to understand users' intentions and the environment. As a result, new challenges beyond conventional multimodal HCI have arisen, including audio, image, video and graphics. To this end, AI-guided intelligent recognition of speech instructions and visual signs has been widely adopted in HCI.

Recently, thanks to emerging sensors and sensing techniques, HCI has been further developed for immersive and affective communication between human users and computer systems. In addition to auditory and visual clues, touch, taste and smell have also been explored in this context. How to effectively use these individual sources of information, and also fuse some of them together for different levels of tasks, still requires exploration.

In this Special Issue, we aim to provide a forum for colleagues to report the most up-to-date results of developed models/algorithms/approaches/techniques, as well as comprehensive surveys of the state of the art in relevant fields.

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
