## Accelerated MRI Based on Compressed Sensing and Deep Learning

Guest Editor:

### **Dr. Hyungseok Jang**

Department of Radiology,  
University of California San  
Diego, 9500 Gilman Dr, La Jolla,  
CA 92093, USA

Deadline for manuscript  
submissions:

**closed (30 April 2023)**

### **Message from the Guest Editor**

Magnetic resonance imaging is one of the most important medical imaging modalities used in clinic due to its excellent soft tissue contrast. To form an MR image, a radiofrequency signal from spins of targeted nuclei is acquired to form a 2D or 3D k-space. To achieve the desired tissue contrasts or quantitative parameters using MRI, a long signal preparation or acquisition time is required, thus a clinical MR exam that includes multiple imaging series with different image contrasts typically takes ~30 min to ~1 hours. Therefore, accelerated MR acquisition is crucial to minimizing both patient motion and discomfort.

Compressed sensing was first investigated in the field of conventional signal processing and allows the detection of signals from undersampled data by exploiting a property known as “sparsity.” It has recently been incorporated into MRI by utilizing sparsity in either the native image domain or transformed image domain. Deep learning-based acceleration techniques have been investigated in MRI.

In this Special Issue, novel accelerated MRI techniques based on compressed sensing and deep learning are presented.

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
