## Augmented Reality Navigation Systems in Health Care

Guest Editors:

**Dr. Mario Romero**

**Prof. Dr. Roger Härtl**

**Dr. Erik Edström**

**Dr. Adrian Elmi-Terander**

**Dr. Benno Hendriks**

**Dr. Ibrahim Hussain**

Deadline for manuscript  
submissions:  
**closed (30 October 2022)**

### Message from the Guest Editors

The application of augmented reality technology to health care holds great promise in that it can provide users with pertinent visual information while they are performing manual tasks. In surgery and interventional radiology, augmented reality is used to provide navigational feedback on instrument positions in relation to anatomical structures to assist the physician in carrying out a procedure with maximal accuracy. For the coming generations of augmented reality systems improved matching between the real world and superimposed data is essential. Sensors are needed that accurately decipher our three-dimensional environment. For this issue we welcome clinical papers describing new technical solutions for AR navigation in different surgical and interventional fields as well as technical papers on the design of new AR systems with special emphasis on patient recognition and tracking for accurate image overlay. Novel solutions or applications of intraoperative imaging modalities and sensor technologies for the visual, infrared, hyperspectral and X-ray spectra are of great interest.

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
