Deadline for manuscript  
submissions:

**closed (30 April 2022)**

### Message from the Guest Editor

Dear Colleagues,

Some animals with excellent olfactory discrimination capabilities (i.e., dogs, mice, bees, etc.) can be conditioned to sniff and identify target volatiles. The conditioned animal can quickly recognize the unique odor of volatile organic compounds and exhibit various signal behaviors, acting as an animal nose sensor. Animal nose sensors are mostly applied in the field of drug detection dogs or mine/explosive detection. When it comes to medical applications, animal nose sensors, which utilize the animal's sense of smell to detect disease-specific odors, are a technology that has all of these non-invasive and early detection benefits. There is growing interest in detection animals in the areas of forensic science, land security, and disease diagnosis.

We invite original papers that address behavioral odor detection by animals. The topics of the Special Issue "Animal Nose Sensors" include narcotics detection, explosive detection, environmental monitoring, food safety detection, and disease diagnostics using animal olfaction.

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
