### Message from the Guest Editors

This Special Issue aims to report high-quality research in recent advances in the antennas for satellite navigation.

The manuscripts should cover the design, measurement and/or characterization preferably in, but not limited to, one of the following topics:

- GNSS antennas in mobile devices
- GNSS antennas for automotive applications
- GNSS antennas for aeronautic (including UAV) applications
- GNSS antennas for space applications
- GNSS antennas for reference station applications
- GNSS antennas for timing applications
- GNSS antenna miniaturization
- GNSS smart antennas (e.g., arrays against interference or multipath)
- GNSS antenna measurement and calibration
- GNSS antenna integration in challenging platforms
