

Cell-Free Ultra Massive MIMO in 6G and Beyond Networks

Guest Editor:

Dr. Chunguo Li

School of Information Science
and Engineering, Southeast
University, Nanjing, China

Deadline for manuscript
submissions:

closed (20 April 2022)

Message from the Guest Editor

In recent years, multiple antenna technologies have received considerable attention from both industry and academia, given that they can provide high coverage probability, spatial multiplexing, and macroscopic diversity. To provide ubiquitous wireless connectivity and achieve orders-of-magnitude improvements in these metrics, the new paradigm shifts away from the transitional massive multiple-input multiple-output (MIMO), cell-free ultra massive MIMO and intelligent reflecting surfaces (IRSs) at the physical layer are expected to achieve this goal.

The potential topics of submissions include, but are not limited to,

- channel modeling, characterization,
- signal processing and estimation for B5G/6G Ultra massive MIMOs,
- cell-free massive MIMOs,
- cloud-RAN cooperative cell-free massive schemes,
- wireless communications through reconfigurable intelligent surfaces,
- AI,
- deep learning,
- machine learning for wireless communications,
- performance analysis and simulations for integrated networks,
- information-theoretic aspects of wireless communications.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
