Deadline for manuscript submissions:

closed (30 November 2022)

Message from the Guest Editors

Dear Colleagues,

Community question answering (CQA) encompasses a broad class of services for knowledge sharing and collaborative learning, that allow askers to post questions upon specific information needs, in the attempt to receive satisfactory responses from expert answerers of the consulted community. Essentially, in CQA, the information needs of askers together with the wisdom, replying willingness and collective intelligence of answerers form altogether a human and social computation system. Within the latter, askers and answerers operate as human sensors. The former report the emergence of an information need in the community. The latter act individually and/or cooperatively, to sense and process the information needs posted by askers in their questions, so that these latter can be timely and satisfactorily replied through high-quality responses. Hitherto, the increasing relevance and popularity of CQA have fostered a wide spectrum of contributions from both academia and industry

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
