Communications Signal Processing and Networking in the Pandemic

Guest Editors:

Prof. Riccardo Raheli

Università di Parma,
Dipartimento di Ingegneria e
Architettura, Parco Area delle
Scienze 181A, 43124 Parma, Italy

Prof. Luigi Atzori

University of Cagliari, Italy

Deadline for manuscript
submissions:

closed (20 March 2021)

Message from the Guest Editors

Communications signal processing and networking technologies represent some of the most prominent ones, as they can significantly help in one of the most effective strategies to undertake the fight—that is, the 3T plan (test, track, and treat). Indeed, the “track” component can significantly benefit from solutions based on the processing of personal device signals. We also know that the crowding of people should be avoided, and that crowding conditions could be automatically detected (e.g., by the use of optical systems, Lidar techniques, and WiFi sniffing solutions).

This Special Issue solicits innovative contributions from both academia and industry in the field of communications signal processing and networking systems, architectures, tools, and devices that may help humanity effectively face this unprecedented pandemic scenario.

- People counting
- Contact tracing
- Virus spreading in complex networks
- Signal processing for distance estimation
- Sensors for health condition estimation
- System for crowd alerting
- Digital learning
- Smart working

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
