AI-Supported Fog Computing for Smart Cities

Guest Editors:

Dr. Fangyu Li
Faculty of Information Technology, Beijing University of Technology, Beijing 100124, China

Dr. Liang Zhao
Department of Information Technology, Kennesaw State University, Marietta, GA 30060, USA

Dr. Yihuai Lou
Center for Hypergravity Experimental and Interdisciplinary Research, College of Civil Engineering and Architecture, Zhejiang University, Hangzhou 310058, China

Deadline for manuscript submissions:
closed (30 October 2023)

Message from the Guest Editors

This special issue focuses on recent developments of AI-supported fog computing for smart cities. It covers distributed machine learning, decentralized AI, fog computing architecture and deployment, data management, security, privacy, as well as fog-based applications.

This special issue invites researchers to present state-of-the-art research and provide insights into the challenges and opportunities in fog computing for smart cities. We encourage innovative solutions for addressing the growing demand for low-latency and high-bandwidth applications and services in smart cities, as well as the need for secure and privacy-preserving data processing and storage. Topics of interest include, but are not limited to:

- AI-supported efficient and effective distributed data processing
- Data management strategies in fog computing environments
- Security and privacy issues in fog computing for smart cities
- Real-world deployments and case studies of AI-supported fog computing in smart cities
- Technical and practical aspects of implementing AI-supported fog computing in smart cities

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.
Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
