Message from the Guest Editor

Dear Colleagues,

With the rapid development of today's society, humanity is facing more and more unprecedented challenges in a disproportionate threat to health, rights and well-being, among other things. Community-dwelling **older adults** are considered one of the most **vulnerable** profiles, and their chronic conditions may be aggravated by the consequences of confinement. However, these measures, which vary in their nature from country to country, have potentially unknown short-term, or even long-term, side effects. To date, most countries continue to discuss the implementation of protection rules for high-risk groups, such as the elderly, even after the end of wider regulations. According to these observations, the social disconnection of the elderly must also be taken into consideration, since this age group is the least adapted to digital technologies. A potential tool or strategy would be development and training in digital technology adoption to support families and communities. This call for manuscripts aims to promote research along these lines.

Special Issue

sensors

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
