Message from the Guest Editors

Dear Colleagues,

New trends in sensing technologies, innovative 3D biomaterials, and novel measurement techniques have recently gained increasing attention for several cellular and biological tissue applications. The aim of this Special Issue is therefore to focus on the most emerging technologies, novel devices, innovative biomaterials, or applications in the biological and biomedical fields.

The list of topics includes but is not limited to the following:

1. Mechanical and/or electrical characterization of specific biomaterials and biological cells and tissues;
2. Innovative measurement techniques for cell, biomaterial, or tissue characterization;
3. Metrological characterization of sensors systems or novel devices for cell and tissue applications.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
