Message from the Guest Editors

Dear Colleagues,

To better support efficient and secure DSS in future wireless systems, more technical solutions are required from both academia and industry. This Special Issue aims at attracting the latest high-quality research outcomes regarding DSS for future wireless communication systems. It solicits new fundamentals, architectures, advanced methodologies, and promising use cases that promote DSS. Topics include but not limited to

Advanced DSS architectures for future wireless systems;
Blockchain framework design and optimization for DSS;
Blockchain-enabled crowd spectrum sensing for DSS;
Blockchain-assisted spectrum regulation;
Big spectrum data processing for DSS;
Digital-twin-assisted DSS;
Edge-computing-assisted blockchain for DSS;
Learning-assisted spectrum prediction for DSS;
Incentive mechanism design for DSS;
Intelligent spectrum resource management for DSS;
Security and privacy preservation for DSS.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
