

Deep Learning Technology and Image Sensing

Guest Editors:

Prof. Dr. Sukho Lee

Division of Computer Engineering, Dongseo University, 47 Jurye Road, Sasang Gu, Busan 47011, Republic of Korea

Prof. Dr. Dae-Ki Kang

Machine Learning/Deep Learning Research Labs, Department of Computer Engineering, Dongseo University, Busan 47011, Republic of Korea

Deadline for manuscript submissions:

closed (20 April 2024)

Message from the Guest Editors

Deep learning-based computing technology is significantly improving the quality and reliability of image recognition data today. For example, in the field of autonomous driving, the performance of the sensor itself is also increasing through deep learning based on sensor and data fusion between front camera sensors and radars. Other deep-learning-based computer vision technologies help to improve the performance of smartphone camera applications such as face recognition, panorama photography, depth/geometry detection, and high-quality magnification and detection. Still, other computer vision technologies have come to accurately recognize human behavior and posture. This allows the use of human behavior as a tool for human–computer interfaces (HCI) in applications such as the Metaverse. This Special Issue covers all topics related to applications using deep-learning-based image and video sensing technologies. Topics include but are not limited to:

- Deep-learning-based image sensing techniques;
- Deep-learning-based video sensing techniques;
- Deep-learning-based computer vision algorithms;
- Deep-learning-based computational photography.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
