Deep Learning, Deep Reinforcement Learning for Computer Networking

Guest Editors:

Prof. Dr. Seokhoon Yoon

Electrical and Computer
Engineering, University of Ulsan,
Ulsan 680-749, Korea

Dr. Jangyoung Kim

Department of Computer
Science, University of Suwon,
Gyeonggi-do, Hwaseong, Korea

Deadline for manuscript
submissions:

closed (15 September 2021)

Message from the Guest Editors

Over the last decade, there has been a great development in deep learning, which is considered as a promising technology for diverse areas including computer networking. Despite a considerable amount of efforts, applying deep learning technology to computer networking is still at an early stage. For instance, using deep learning to control network resources where multiple heterogeneous networks co-exist has been poorly studied. Additionally, the limitation of deep learning in networking due to lack of available network data has not been sufficiently addressed. Moreover, the high time and space complexity problem of deep reinforcement learning, which is another important research direction of intelligent network control, remains as a major challenge. Through this Special Issue, we aim at assembling high-quality research papers on deep learning and deep reinforcement learning-based computer networking. The Special Issue will be an open platform for researchers to share pioneering ideas and studies.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
