### Message from the Guest Editors

Dear Colleagues,

The World Health Organization (WHO) has declared the novel coronavirus 2019 (COVID-19) an international health emergency due to severity of infection progression. International health agencies are making serious efforts to manage the COVID-19 epidemic via exploring every aspect of therapy development with a special attention on investigating smart diagnostics tool needs for rapid and selective detection of the COVID-19 protein.

Efforts are being to make investigate biomarker specific to COVID-19 and required to develop vaccines, drug, therapies, and diagnostics system. Keeping challenge of rapid and diagnostics at point-of-care, experts have suggested exploring nano-enabled sensing systems.

Keeping this in view, this Special Issue welcomes research findings, technical notes, and full reviews addressing the aspects of smart sensing of COVID-19 for health wellness.
